

RISK CONSULTING MARINE

Minimise risks systematically.

Keeping an eye on the big picture.

Global risk management is becoming more important for industrial enterprises. The basis for this is active risk engineering which enables comprehensive risk evaluation along the entire value chain. As a result, global loss potentials can be limited, especially in the transport sector, and the company's international ability to act is ensured.

Global know-how

HDI Risk Consulting offers its customers worldwide access to some 170 engineers and experts from a wide range of technical disciplines with professional expertise across all Lines of Business.

Support for the identification of transport risks is given by experts like:

- Captains (Master mariner)
- Marine engineers
- Packaging specialists
- Mechanical engineers
- Anti-theft experts (Crime intelligence)
- Supply chain managers
- Business Interruption specialists

Expert's advice

Risk assessment

Draw on the global expertise of our risk engineers when identifying and evaluating risks for safer transportation of your goods.

From transport enquiries to support

HDI Risk Consulting performs intensive research on the cause of losses and is permanently working on optimizing loss prevention. Clients can count on competent advice and support by our local experts for upcoming transports as well as for complex conception and planning.

The main focus points of Marine Risk Engineering are:

- National and international cargo transports as well as value chains
- Project cargo, i.e. plant construction, chemicals, energy and paper production
- Automobile manufacturing and supplier logistics
- Cold chain risk control including pharma (GDP)
- Packaging technology
- Renewable energy
- Onshore/Offshore
- Steel and commodities
- Protection against theft
- Customer training/Know How transfer

In addition to marine insurance HDI Risk Consulting supports with all questions regarding transport planning, packaging, storage conditions and cargo handling. Clients obtain also advice on selecting transport means and international itineraries, of course including the used subcontractors, too. Take advantage of HDI Risk Consulting's professional expertise for your business success!
