

## Core points overview:

### Best cover while en route

For all routes and means of transport around the world, HDI provides full cover for goods in transit.

### Extend the cover to include Marine Consequential Loss Insurance (business interruption)

If production comes to a halt due to damage in transit, the fixed costs and loss of earnings can also be insured.

### International skills

With our global experience we can also reliably deal with and cover any special regional aspects of transport.

### Analysis and Prevention

Our experts do not only work out exactly what you need for your transport risks. They will also assist you with loss prevention.

“Goods and materials travel round the globe: you need the best cover to travel with them.”

## An overview of our services

### Goods in transit insurance

Insurance against damages to goods in transit which occurs upon loading, unloading and transshipment as well as during any required interim storage. At the same time, gaps in cover which could result from the liability of the carrier are closed. The insurance cover applies to the full value of the goods up to a contractually-agreed cap. Exhibition insurance and luggage insurance offer needs-based options for expansion.

### Risk Consulting

includes a range of consulting from requests for transport quotations and risk monitoring to investigation of causes of damage and improving preventative measures. Customers receive support with planning transport, packaging, securing loads, evaluation and selection of storage locations among other things (e. g. for exposure to NatCats, storage quality) as well as for temperature controlled transportation. Qualified expert evaluations of technical security requirements are provided by a global team.

### International programmes

Ensuring global insurance cover that matches your needs by creating an international insurance programme, consisting of a master policy and local policies. Individual customer care through a worldwide network in over 130 countries and central points of contact situated locally. Location-specific risk analysis is optimised by using a web-based reporting tool.

### Marine Consequential Loss Insurance

Financial protection in the case of production stoppages as a result of transport losses. Cover applies to ongoing fixed costs such as rent, salaries and interest payments as well as net business profits. As additional costs incurred as well as the loss of income may be insured, the insurance covers not only protects your business operations, but also serves to protect related investments.

### Transit liability insurance

Cover for legal and contractual liabilities arising from transport contracts that the policyholder has concluded as a freight forwarder, carrier or warehouse keeper. These service providers assume an important responsibility in the context of national and international cargo transport. They are often held liable for damages regardless of fault.

### Claims management and analysis

A decentralised structure of claims management ensures short paths and fast claims processing. A personal point of contact on location takes care of all matters from reporting the loss through to settlement. Based on many years of experience, cause and ramifications of damage are precisely assessed by means of thorough analysis and loss prevention strategies are worked up.

## On the move around the world with confidence.

The world is getting smaller and with it the economy. Great distances and foreign languages are no longer barriers to trade, as a result of ever advancing globalisation. The result: manufacturing processes are no longer limited to regions or countries. Instead, individual production steps are located wherever the conditions are most favourable.

Regardless of whether the goods are transported by truck, ship or aircraft: manufacturers, wholesalers and, where relevant, also freight forwarders, carriers and warehouse keepers all share a central interest in obtaining complete insurance covers against damage and liability risks.

Within the area of marine insurance, you can individually design your insurance cover using different, combinable insurance products and services.

In addition to the services and products described here, you can access further insurance solutions as well. Please feel free to contact us!
