

PROFESSIONAL SUPPORT

for property damage and business interruption losses.

Global presence on site in critical situations.

Industrial companies are exposed to a wide range of diverse risks. A fire or an explosion on business premises can cause substantial damage. The same applies to natural disasters such as storms and flooding. The financial consequences are serious, particularly in view of loss of profits from impaired production. Business interruptions can jeopardise the continued existence of the company.

When customers suffer a loss, HDI is ready to support them with professional claims management. In the case of major claims in particular, it is necessary to localise potential hazards at an early stage and implement the best possible loss mitigation measures. Customers can benefit from the extensive claims experience held by HDI without having to give up their own freedom to act and make independent decisions. Fast reinstatement of the damaged

areas limits the risk of losing customers and safeguards the future viability of the company.

After a loss, our employees quickly arrive on site whether it is the head office of the company or a location abroad. The company can rely on rapid provision of compensation payments and complete settlement for the loss and damage.

“When a really serious event happens, you can rely on fast and uncomplicated claims settlement. You will receive professional help through our proactive claims management.”

HDI Global SE offers these advantages

- Professional expertise for processing major claims is bundled at a central location and is managed worldwide from there.
- Our field adjusters act as central contacts and decision-makers.
- They put together a team of experienced insurance experts appropriate to the individual situation and the damage caused.
- A long track record of experience in industrial and commercial claims situations ensures sector-specific knowledge even in industrial branches that are less prominent.
- Coordination between the master policy and local cover is ensured.
- Damage claims abroad can therefore be settled smoothly and without delay.

We are ...

- the strong partner for companies of all sizes and in all industries
- there for you in person, with skilled partners on location
- experienced in the development of perfectly customised insurance solutions
- strong performers thanks to our comprehensive risk management and our excellent claims handling
- able to resolve problems internationally, in over 130 countries
- integrated into a financially strong group: Talanx
