

THE TRANSPARENT ONLINE SERVICE

For your international insurance programme.

For more transparency.

Control and manage your international insurance contracts easily and comprehensively with Reporting International Programmes (IP-Web). Our online tool provides you with all the details you require at a glance, including premiums, policies, insured locations and previous claims of recent years.

As a registered user of IP-Web you can compare the data of all locations worldwide online with different views. This means you will obtain valuable information for the efficient and continuous control of your international insurance contracts. In this way, comparing a contract over several years and between individual countries can be a helpful basis for comparing the risk situation of individual locations.

IP-Web currently provides access to international insurance programmes in these lines that we insure:

- Liability
- Property/Fire
- Marine
- Engineering
- Group accident
- Motor
- D&O

Expert's tip

An easy introduction

In order for you to make the best use of the application, you will receive a short introduction and an overview of the most important functions as soon as you have been cleared. If you have any questions regarding training, user meetings and events, please get in touch with your personal contact:
